Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

NEW ABSTRACT

A method and system for designing a magnetic structure (20) for providing a monotonic static magnetic field for magnetic resonance analysis. The method comprises: selecting a first geometry (12) defining a volume-of-interest and selecting a magnetic field query (14), which is defined on a plurality of coordinates within the first geometry, the magnetic field query being monotonic. The method further comprises selecting a second geometry (16) defining the magnetic structure and calculating a remanence distribution (18) within the second geometry, by using the first geometry, the second geometry and the magnetic field query.
